#### **WELCOME TO ISOM'23**

# WELCOME STATEMENT FROM THE ORGANIZING COMMITTEE CHAIRPERSON

The 33rd ISOM (ISOM'23) will be held in a HYBRID style with both online and onsite meeting from Nov. 19 to Nov. 22, 2023 at the Takamatsu Symbol Tower, Kagawa, Japan.

On behalf of the ISOM organizing committee, I am delighted to welcome all of you to the ISOM'23.

The last ISOM meeting, held jointly with CLEO-PR2022 and ODF'22 in Sapporo, Japan, provided an opportunity to share the latest research results not only in the areas covered by ISOM, but also with researchers from a wide range of fields that have not previously participated in ISOM.

We believe that ISOM's activities have been very fruitful and have produced significant results. Since the first ISOM in 1987, many papers have been presented and discussed in depth at the conference, which has led to new developments and new applications in the field of optical memory. It has not only produced innovations in optical memory technology, but has also led to the economic development of optical memory-related industries.

In 2017, ISOM extended the conference scope to broader optical fields and applications, and changed the conference name as "International Symposium on Imaging, Sensing, and Optical Memory." The new ISOM includes the fields of image sensing, medical and bio-optics, nano photonics, information system, holographic technologies, as well as optical memory. We believe that the change of ISOM produces technological innovations and new applications in whole field related to this conference.

I sincerely ask all of ISOM'23 participants to discuss on new technologies of the next generation optical memory and new applications of optical memory technologies in coming ISOM'23.

志村努

Tsutomu Shimura ISOM'23 Organizing Committee, Chairperson
